

PFF5-1901

**DESCRIPTION** 

## FRONT RADIUS ARM TO CHASSIS BUSH

## **INSTALLATION GUIDE**

## Contents (parts per pack):

2 x Polyurethane Bushes 1 x PTFE/Silicone Grease

2 x Mild Steel Outer Shells 2 x Stainless Steel Sleeves

2 x Zinc Plated Mild Steel Washers

Please read the complete fitting instructions and check package components before fitment. These fitting instructions are to be used as a guide and in conjunction with workshop manual. It is recommended that:

- -all work to be carried out by a licensed technician;
- -all safety precautions adhered to;
- -wheel alignment to be checked and adjusted as required after any
- -All fasteners must be tensioned to manufacturer's torque settings.

## **Fitting Instructions:**

- 1. Remove the arm from the vehicle and press out the original bush including outer shell.
- 2. Clean any dirt and corrosion from the bore of the arm, removing any sharp edges or burrs around the bore with a rounded file.
- 3. Press the plated steel outer shells into each side of the arm, until sitting flush to the face of the arm.
- 4. Apply some washing up liquid to the bore of the shells and press the polyurethane bush in until fully through the arm.

Tip: If you are having trouble pressing the bush in, try pressing the bush in at a slight angle so that one part of the lip is already in the bore of the shell, and when steady pressure is applied, the rest of the lip should follow.

- 5. Apply some of the supplied grease to the bore and the mounting faces of each bush.
- 6. Add the supplied washer to the stainless steel sleeve and insert the sleeve into the bush. The washer will sit between the sleeve head and bush face.
- 7. Refit the arm to the vehicle and tension all hardware to the manufacturers recommended torque settings.
