

# DESCRIPTION DESCRIPTION

#### **INSTALLATION GUIDE**

## Contents (parts per pack):

PART NUMBER PFF73-520

#### 1 x Polyurethane Insert

Please read the complete fitting instructions and check package components before fitment. These fitting instructions are to be used as a guide and in conjunction with workshop manual. It is recommended that: -all work to be carried out by a licensed technician; -all safety precautions adhered to;

-wheel alignment to be checked and adjusted as required after any suspension work.

-All fasteners must be tensioned to manufacturer's torque settings.

## **Fitting Instructions:**

- 1. Remove lower engine mount from vehicle, by removing removing dust shield and loosening the 2 bolts.
- 2. Some Swift variants may have a small rubber insert glued to the mount, this needs to be removed (Figure 1).
- Push PFF73-520 into the voids in the larger bush on the mount. Ensure it is seated as far into the bush as possible.

Note: Some OEM rubber bushes may have rubber flashing in the voids, which will need to pierced before insert can be fully inserted.

- 4. Refit the mount onto the vehicle, ensuring the flat base of the insert is facing upwards in the subframe.
- Refit all remaining parts in reverse order, and tighten all hardware to manufacturers recommended torque settings.
